

COMMUNICATION TECHNOLOGY

Mobile Radio Communication

Since 1996 we produce steel parts for radio communication. For contractors of German network-operators we deliver individual constructions for new buildings, extension and swap.

We are your qualified partner from site assembling to complete radio stations. (see our attached picture gallery)

Fixed Network

Since 2006 we work for different network-operators and corporations to extend the broadband network. We install hardware in joint-connections and engineering-rooms of data-lines.
(see our attached picture gallery).
