

SPECIAL CONSTRUCTIONS

Special Tools, Load Handling attachment

For repairing and serving of steel mills all over the world we produce different special tools and load handling equipments, e.g.:

- cross-beams for heavy rolls
- c-hooks,
- special lifting devices
- carriages for difficult to access points

(see our attached picture gallery)

Industrial equipments

We produce equipment parts consisting of heat- and wear-resisting steel e.g. for the glass-industry:

- burnt gas tubes
- doghouse parts for bowl-cooling
- wearing parts of silos

We manufacture also belt-sleeve molds and other parts of fiber glass enforced plastics for storage of drinking water and wastewater.

Measurement technique companies are our costumers, too. So we deliver among other things

- titan racks for equipping of machines
- settling measurement devices for road building, which we developed together with the costumer

Our authorization for welding of stainless steel empowers us to manufacture challenging components, also inclusive machining.
